

The
**GOVERNOR'S
INSTITUTES
of VERMONT**

in partnership with

INSTITUTE ON HEALTH & MEDICINE

June 26 – July 2, 2022

Norwich University, Northfield, Vermont

The Institute on Health & Medicine is a 7-day, 6-night residential program for Vermont high school students in grades 9 through 11 who are interested in health care and health science. Participants will explore the science and the practice of exciting and fast-growing fields in health and medicine. College faculty and graduate students will lead hands-on lab science and medical skills workshops. Resources and opportunities will be provided for participants to personalize their career exploration.

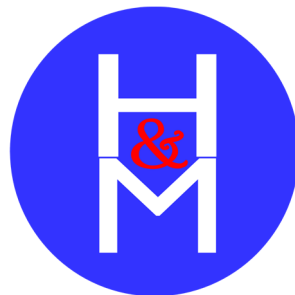

This year, participants will choose an area of health and medical science that interests them. There are opportunities for cross-over exploration if it's hard to pick just one! The three areas featured are:

- **Neuroscience and Neuropsychology**
- **Emergency and Sports Medicine**
- **Biomedical Engineering and Laboratory Sciences**

Recreational activities and social time are planned throughout the week.

**Graduate students
in health & medicine
are available as
mentors throughout
this dynamic institute!**

Mentors provide youth with practical skills and unique understanding about health and medicine in Vermont
